<b>Loudspeakers - Concert Series</b>			
<b>MUGELLO</b>  Super-slim, lightweight Slim-Array Technology active loudspeakers.  Exceptional peak output. Electronic beam-steering removes the need to create 'banana-curve' loudspeaker hangs. Simply suspended in a perpendicular line, these concert-series loudspeakers can save the average tour substantial amounts of money: smaller / fewer trucks, fewer drivers, faster set-up and strike time and lighter-weight suspension requirements. Active format also removes the need for additional, bulky amp-racks and their associated cabling.	<b>KH2</b>	<b>7,680.00</b>	Mugello-KH2, Ultra-thin active and digitally steerable line array. 2 x 1.4" CD and 2 x 8" LF. <b>FIRENZE</b>			
<p><b>Flagship series of powerful, top-of-the-range active touring systems suitable for major live events of any size and scale, Firenze takes the technology of the Mugello series to performance on the next level</b></p> <p>Electronic hyper-detailed Beam-Steering precisely and independently controls each element of the array, eliminating noise pollution. No other system delivers so much in such a compact, lightweight, and swiftly deployable package. A 24-unit cluster can be deployed and flown in less than 10 minutes. Phenomenal performance from perpendicular hangs of compact loudspeakers. Light-weight hangs with minimal trucking space required. This system generates substantial Op-Ex savings when toured, due to its relatively very light-weight and physically compact size.</p> <p style="text-align: center;"><i>Please contact us for more information / demonstration / prices etc</i></p>
